About Omni Micro Systems/ Omni Med Solutions GmbH:

Omni Micro Systems and Omni Med Solutions GmbH is a family of quality-oriented service companies in eHealth/ healthcare information technology. We offer easy-to-use technology solutions for a sometimes over-electronicized world with consultation services and technology research and development in the conversion of manual and paper processes in healthcare to electronic solutions. We are working to build, maintain and support an international, networked and interoperable healthcare information and technology infrastructure. Our goal is to create technologies that can be used by health care providers and consumers. We provide safety and quality to patients and their families worldwide. We strive to build a skilled eHealth Workforce.

Background:

Enabling Better Healthcare Through Technology

Omni Micro Systems/ Omni Med Solutions GmbH provides efficient, customized, quality business products and services in healthcare information technology with global offices in Europe and the USA.

Its mission is to contribute positively to the world and empower others through innovative technology. They aim to set up a global and interoperable network of health information and technology to enable health providers, caretakers and healthcare consumers alike.

Omni Micro Systems, Inc., a Delaware corporation in the USA and Omni Micro Systems/ Omni Med Solutions GmbH, a German company, designs, develops, distributes and implements technology and information systems, predominantly in the healthcare information technology field.

Omni Micro Systems, Inc. is a software and technology development company with the European Headquarters located in Hamburg, Germany, an office located in the heart of Silicon Valley, California, USA and partners and collaborators around the globe.

Founded in 2008 Omni Micro Systems, Inc. is a health information technology development and consulting firm focused on using its talents, resources and ingenuity to create technology and products to give back and positively contribute to our community, society and the world.

The women-minority owned company founded in 2015 with Omni Micro Systems/ Omni Med Solutions GmbH in Hamburg to bring valuable lessons learned within the American healthcare IT industry to Germany and Europe.

Its management team and workforce includes a multinational, multicultural and highly diverse group of talented consultants, designers, analysts, developers, engineers and others who bring a wide array of strengths and backgrounds to the organization.
